The MIRATECH® LTR™

New CARB Level 3+ Verified Diesel Particulate Filter System

Best-in-class LTR (Low-Temperature Regeneration) – Regenerates as Low as 500°F/260°C.

- Designed for maximum reduction of particulate matter (PM) from engine exhaust – up to 97%
- Single-housing assembly contains a DOC and a passive DPF
- Reduces CO, HC, VOC, HAP and PM
- Designed for emergency backup and prime power generators
- Designed to accommodate engines sized from 37 kW to 4 MW
- Provides critical-grade noise reduction, eliminating the need for a separate silencer in many applications
- Can be fitted on Tier 1 and newer engines

Carbon Steel Housings Standard with High-temperature Black Paint

Also Available in 304SS and in 316SS

Designed with Easy-access Service Panels

LTR™ Passive Diesel Particulate Filter

ADVANCED FILTER SYSTEM TRAPS PARTICULATE MATTER AND REGENERATES AT MUCH LOWER TEMPERATURES.
Only from MIRATECH, the LTR™ Filter System offers stationary diesel engine owners/operators new technology with a single-housing assembly that contains a DOC (Diesel Oxidation Catalyst), a passive DPF (Diesel Particulate Filter) that’s optimized for the Low-temperature regeneration, and integrated silencing. The California Air Resources Board (CARB) Level 3+ Verified LTR system is designed for use with diesel engines at all operating conditions, including low exhaust temperature conditions/applications.

HOW IT WORKS
The LTR system has an oxidation catalyst (DOC) built into the front of the filter housing that reduces engine exhaust emissions such as CO, HC, VOC and HAP before they enter the particulate filter (DPF). From there, the DPF is designed to capture up to 97% reduction when required of particulate matter (PM or soot) from the engine’s exhaust. The captured particulate matter is then burned off passively from the exhaust’s temperature through catalytic oxidation (no additional heat is required).

BUILT FOR PERFORMANCE
CARB Verified kit with manual, monitor and data-logging is available to help the user comply with current CARB rules.

FULL SUPPORT CLOSE TO HOME
Technical services and training provided by MIRATECH, along with field service from authorized MIRATECH representatives, ensures prompt, reliable product support is just a phone call away anywhere in North and South America.

NEED EMISSIONS AND ACOUSTIC SOLUTIONS? CONTACT MIRATECH.
For more than 20 years, MIRATECH has been at the forefront in helping industries handle emissions and acoustic standards. Whatever your emissions needs may be, count on MIRATECH for solutions. Just give us a call or visit our website: MIRATECHcorp.com.
